

AFT Manufacturing

- Metal Stamping
- Metal Fabrication
- Assembly Services
- Engineering/Design
- Laser Cutting
- Quality Assurance

As a full service sheet metal fabricator, AFT Manufacturing excels at meeting the stringent policies of this industry, including: quality products, precision engineering, on-time delivery and competitive pricing. We look at each customer as a partner, and we work together with our partners as each project flows from concept to completion. This communication ensures that each project meets or exceeds our customers' expectations. Customer satisfaction is our HIGHEST PRIORITY.

Metal Stamping:

AFT Manufacturing's variety of high capacity multi-ton presses, metal forming equipment and large on-site metal inventory make short order of even the most complicated projects.

- Aluminum
- Stainless Steel
- Steel
- Brass
- Most Sheet Metal

Some types of Stamping Processes:

- Bottom Piercing
- Coining
- Die Forming
- Marking
- Notching
- Punching
- Stamping
- Trimming

Metal Fabrication:

With decades of craftsmanship and experience in metal forming and fabrication, AFT Manufacturing excels at producing the highest quality sheet metal parts. Precision fabrication, in many different types of metals, is a must for low-tolerance precision parts.

AFT Fabrications:

- Cutting
- Shearing
- Chiseling
- Welding
- Joining
- Hammering
- Press Brake Bending

AFT MFG (cont) - Laser Cutting:

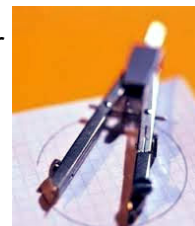

AFT uses the most trusted name in laser cutting technology, the Trumpf TruLaser 3030. Laser cutting has become a sought after process of fabricating materials, especially metals.

A few reasons to choose laser cutting over mechanical cutting:

- Easier Workholding
- Increased Precision
- Reduced Contamination
- More Materials Applicable over Mechanical
- Less Material Damage or Warping

Engineering & Design:

Every project begins with a customer's plan or one of our professional designs. It is our mission to help with all customer logistics from a complete Quote to a final delivery schedule. We believe that a great design is the first step to a great product and a satisfied customer.

Assembly Services:

Joining two or more components into a final assembled product is one of the quality services AFT Manufacturing provides. We look at the final product's specifications and assemble a quality assured product. This service saves manufacturers' time and resources by professionally outsourcing products and their assembly to AFT.

Quality Assurance:

AFT Manufacturing is an ISO certified manufacturing company that believes in stringent quality assurance practices. Our philosophy is that Quality Control is EVERY person's responsibility on every project. Precision is tested at numerous points in every project to ensure our number one mission:

CUSTOMER SATISFACTION.

Other Industrial Services:

Plating & Coating

Hardware Kitting

Custom Manufactured Fasteners & Modifications

Inventory & Warehousing

Import & MIL Shipments
