

Threaded Rod

AFT Fasteners carries a large line-up of Threaded Rod Products. Industry standards like ASTM and others can easily be met by AFT Fasteners for petroleum applications, construction, fabrication, electrical and consumer product manufacturing. Standard and non-standard sizes, course or fine threads and most industry desired platings and coatings are readily available from global solutions providers - AFT Fasteners.

Threaded Rod Categories

- **All-Thread or Fully Threaded Rod** - perfect for pipes with gaskets and flanges - Xylan Available
- **Anchor Bolts** - mostly used in concrete or masonry structures
- **Bent Sag Rods** - used for preventing the sagging of an open web steel joist
- **Chemical Anchors** - anchors bonded into a substrate, concrete, using a resin based adhesive
- **Double-End Rods** - bent into U-bolts to a specified size or applications without middle thread
- **Eye Bolts** - thread on one end and an "eye" on the other - often used to attach cables to objects
- **J Bolts** - mostly set in wet concrete before it hardens so as to attach objects to it later
- **Single End Rods** - generally bent into right angles - perfect for serving as anchor bolts
- **Threaded Studs** - B7 is the most common which are smaller cuts of all-thread rod
- **U Bolts (Square & Round Bend)** - often used for attaching items to poles and beams
